The construction is anticipated to commence by August 2023. The project will include connecting the installations to the national grid and the installation of battery storage. The energy minister, Alexandre Monteiro also explained that in addition there were five more renewables projects in progress. These include wind and solar.

The battery can store the extra energy produced from solar panels during the day to avoid using electricity at a more expensive rate. The peak time-of-use (TOU) rates can be double the price compared to off-peak rates.

A side from the solar panels, solar companies have many other manufactured products that are required to make solar energy systems work smoothly, like solar inverters, batteries, combiner boxes, and racking and tracking structures.
