

What is Anguilla's energy mix?

Anguilla has a high solar potential and set a renewable energy mix target of 30% by 2030. Presently Anguilla's energy mix is comprised of only 4% renewable energy. Its electrical demand peaks at 16MW and its electricity prices are high relative to the rest of the Caribbean.

How many people live in Anguilla?

The population of Anguilla is 15,000 and most reside in proximity to The Valley. Anguilla has a high solar potential and set a renewable energy mix target of 30% by 2030. Presently Anguilla's energy mix is comprised of only 4% renewable energy.

Does Anguilla have energy consumption by sector?

Energy consumption by sector is unknown. The draft CCP facilitates the transition of Anguilla to an energy independent, climate resilient, energy-efficient, low-carbon economy.

Where is Anguilla located?

Anguilla, a British Overseas Territory in the Eastern Caribbean, comprises a small main island and several offshore islets. The population of Anguilla is 15,000 and most reside in proximity to The Valley. Anguilla has a high solar potential and set a renewable energy mix target of 30% by 2030.

Does Anguilla use oil?

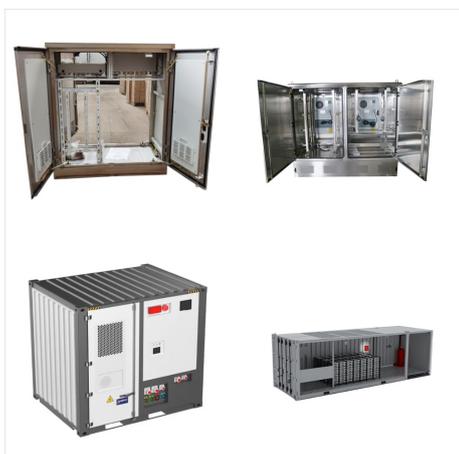

Like many island nations, Anguilla is almost entirely dependent on imported fossil fuels (more than 99% of the island's electricity is generated using heavy fuel oil), leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

How much electricity does ANGLEC generate?

ANGLEC has an installed generation capacity of 33 megawatts (MW), a total annual consumption of 88.56 gigawatt-hours (GWh), peak demand of 13.99 MW, and 9.78% transmission and distribution losses, which translates to 8.57 GWh. In the past, ANGLEC generated electricity primarily from less-efficient high-speed diesel units.

Photoelectrochemical cells (PECs) are solar cells based on a semiconductor??electrolyte interface. The working electrode, also referred to as photoanode, is normally an n- or p-type semiconductor, i.e. a polymer semiconductor on an ITO/FTO substrate, held by a platinum plate electrode holder. In photoelectrochemical cells, the counter
