

What is a solar phone battery charger?

Whether you're traveling, camping, or simply walking around, a solar phone battery charger provides an easy and environmentally-friendly solution. Solar phone battery chargers use the same technology as rooftop solar panels to charge your phone or other devices.

Are solar phone chargers a good idea?

Solar phone chargers are a great way to stay powered up on the go. They are portable, lightweight, and can be used to charge your phone or tablet. Whether you're an outdoor enthusiast or simply looking for an eco-friendly way to charge your devices, read our list of the best solar phone chargers and power banks.

How do solar phone chargers work?

Solar phone chargers use the same technology as regular solar panels but on a much smaller scale. The sun hits a small solar panel, which either charges a battery bank or directly plugs into and powers your phone, much like solar panels on your roof can power your home directly or charge a battery system.

What are the different types of solar phone chargers?

There are two types of solar phone chargers: Direct solar chargers connect the solar panels to your phone, so the energy produced by the panels goes directly into your phone's battery. A battery bank solar charger doesn't get hooked up to your phone.

How much power does a solar phone charger use?

A charger between 10 and 15 watts of power is usually sufficient for charging one or maybe two phones. The wattage of a charger is the amount of solar electricity it can produce, so larger panels usually mean more wattage. There are two main types of solar phone chargers to keep an eye out for:

What is the best solar phone charger?
