

Will there be a new solar farm in Hertfordshire?

Proposals have been submitted for a new solar farm in Hertfordshire's countryside. RNA Energy has brought forward plans for a new solar farm and battery storage facility at Redcoats Farm near Hitchin in North Herts.

What is solar together Hertfordshire?

Solar Together Hertfordshire is an innovative new scheme offering solar photovoltaic (PV) panels and battery storage. It is a group-buying scheme, which brings Hertfordshire households together to get solar panels at a competitive price, helping you through the process and keeping you informed at every stage.

Which solar schemes are supported by North Herts Council?

Solar Together is the only solar scheme currently supported by North Herts Council. We have no involvement with other solar schemes which may be running in Hertfordshire. For any other queries, please contact Solar Together:

Where is RNA energy planning a new solar farm in North Herts?

RNA Energy has brought forward plans for a new solar farm and battery storage facility at Redcoats Farm near Hitchin in North Herts. The site would be set across approximately 35.1 hectares of land to the south of Sperberry Hill/Stevenage Road and between St Ippolyts and Titmore Green. Will solar panels make North Herts a greener district?

Become greener - we want North Herts to be carbon neutral by 2040, but a significant portion of our district's emissions currently come from domestic energy usage. Solar panels will allow you to generate your own renewable energy and reduce your impact on the environment so we can all live in a cleaner and greener district.

Why should you install solar panels in Hertsmere?

Installing solar panels can increase your energy independence, reduce your carbon footprint and save money. We have once again partnered with independent experts in group-buying, iChoosr Ltd, to bring this opportunity to Hertsmere's homeowners.

Solar energy plays a pivotal role in reducing reliance on fossil fuels, lowering greenhouse gas emissions, and decreasing air pollution. By converting to solar energy, you are contributing to a cleaner, more sustainable future. Solar power is a renewable resource that helps to combat climate change by emitting far fewer pollutants than conventional energy sources.

At Williams Renewables, we understand the significance of maintaining your solar panels to achieve optimal performance and longevity. Our expert solar panel maintenance services in Hertfordshire are specifically designed to ensure that your system consistently generates clean and renewable energy for many years.

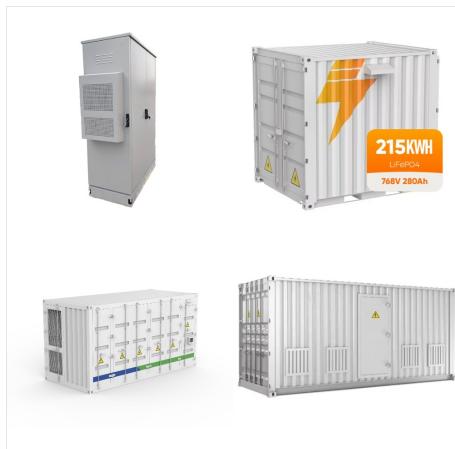

AGR 4 Solar Limited wants to build an 88-hectare (0.8 sq km) solar farm near three villages in Hertfordshire. Thirteen objections have already been raised, including one describing it as
