

Large scale solar projects meant to power Michigan's homes and businesses are expanding, with potential developments popping up across the state. And while the wind turbines that now rise higher than the Washington Monument will keep spinning across sections of Michigan, solar energy parks are expected to be the primary new renewable energy

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Michigan homeowner needs a 9.63 kW solar panel system to cover their electricity needs, which comes out to \$30,018 before incentives.

We can add solar generation gradually to meet Michigan's changing energy needs without building a large, new fossil fuel power plant. We've already begun adding more clean, renewable, solar-generated electricity and plan to bring 1,100 megawatts of solar capacity online by 2024.

The total amount you can save in Michigan with the federal tax rebate program for a new solar power system is around \$5,000. The issue with solar in Michigan is that there are localized incentives that apply to certain areas but depending on if you live in Lansing, the Great Lakes area, or Detroit, these programs vary.

Solar panel systems in Michigan are expensive, but incentives from the state and federal governments can help you reduce the upfront cost. Between the federal tax credit and other state-specific incentives, you can save thousands on solar panels, making them well worth the investment.
