

Could a 500MW solar project be built in South Norfolk?

Island Green Power is seeking public opinions on provisional plans for a nationally significant solar and storage project in South Norfolk. The renewable energy developer has launched public consultation on early-stage proposals for a 500MW solar development co-located with a battery energy storage system (BESS) that could have up to 500MW output.

Is Island Green Power planning a solar & battery energy storage project?

Island Green Power has unveiled plans for a utility-scale solar and battery energy storage project in Norfolk, England.

Who is Island Green Power?

Island Green Power is a leading developer of renewable energy projects, with a focus on utility-scale solar farms and battery storage systems. Our mission is to help the UK increase our solar energy generation, making more renewable energy possible and drastically reducing carbon emissions. The way we consume energy is already changing.

Where is the Drovers Solar Farm - Island Green Power located?

The Drovers Solar Farm - Island Green Power is in the early stages of developing a new solar project located on land north of Swaffham and south of Castle Acre, West Norfolk. Island Green Power is in the early stages of developing a new solar project located on land north of Swaffham and south of Castle Acre, West Norfolk.

Why is Norfolk Island transitioning to green energy?

Norfolk Island is transitioning to green energy to reduce its dependence on diesel-fired generation, which is becoming more expensive and more difficult to source as countries around the world seek to decarbonize their economies. This initiative is comprised of several interrelated elements: Project Background

Who is East Pye solar?

East Pye Solar Ltd, part of Island Green Power, is introducing plans for a utility scale solar and battery energy storage system (BESS) on land near Long Stratton in South Norfolk, England. Phase One consultation on the Project launched on Wednesday 23 October 2024.
