

What are solar powered street lights?

Solar powered street lights are a highly efficient and cost-saving option for roadways and other spaces. At SEPCO, our solar LED street lighting systems generate efficient lighting without the need for standard electrical hookups.

What are solar street light poles?

Alongside the evolution of modern transportation, solar street light poles will also serve as a platform to integrate other modular systems, such as IoT-based intelligent traffic management, city governance, etc. Solar street light poles are generally set up and fixed on sturdy reinforced concrete foundations like most street lights.

How high can a solar power street light be mounted?

It can be mounted on a wall or pole easily (supported pole diameter: 1 inch to 3 inches, suggested fixed height: 13-15ft). **FASTER CHARGING?** Solar power street light is green and energy-saving, polycrystalline silicon solar photovoltaic panels have high photoelectric conversion efficiency.

Are street light poles concrete?

Today, you can hardly see concrete poles used for street lights. The majority of street light poles are made of steel or aluminum. Steel solar street light poles and aluminum poles differ in many properties, involving stiffness, strength-to-weight ratio, corrosion resistance, maximum height, processing and price.

What are the different types of solar-powered LED streetlight fixtures?

Various commercial solar-powered LED street light fixture styles are available, from standard Cobrahead fixtures to architectural style fixtures. Each solar LED streetlight fixture provides the needed lighting levels and distribution pattern to provide the perfect lighting solution to meet the application's requirements.

How do solar-powered LED street lights work?

The solar and battery are selected to operate the load for the set period of time with plenty of backup power for times of inclement weather. Various commercial solar-powered LED street light fixture styles are available, from standard Cobrahead fixtures to architectural style fixtures.

# SOLAR POWER STREET LIGHT POLE

Solar street lights are designed to be essentially maintenance-free. However, in certain regions with extreme conditions, some level of maintenance is required to ensure the proper function of the lights. These regions are typically where there is a risk of dust, snow, or ice covering the solar panels and thus reducing the power of the lights.
