

The Extensive Testing Of The Prius Solar Roof. Starting with the 2010 Prius, Toyota began offering a solar roof as an option. In comparison, the earlier version only produced 50 watts of power. In addition, the solar roof didn't link to the car's driving battery power but only provided electricity to the car's climate control system.

Energy Independence: Harnessing solar power with a Prius solar roof promotes energy independence by allowing you to generate electricity on the go. This independence from traditional fuel sources can provide peace of mind during emergencies or long journeys where access to charging stations may be limited. relying on the sun's energy can help maintain ???

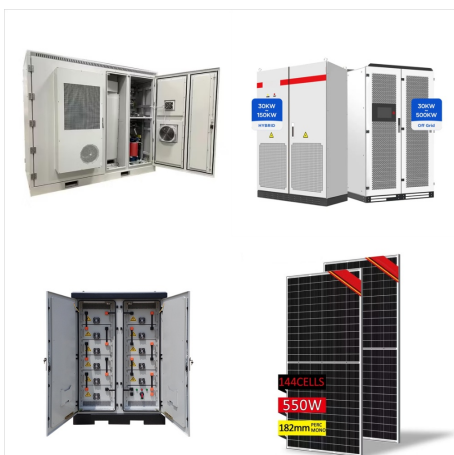

Solar-Powered Sunroofs: Imagine harnessing the power of the sun to recharge your Prius Prime's battery while you drive. With advancements in solar panel technology, Toyota is exploring the possibility of integrating solar-powered sunroofs into future models, further reducing the vehicle's environmental footprint and reliance on fossil fuels.

If you live in Midwest, just pass on the solar roof. Not worth it IMO. Go straight to Prius V. I bought the Four with solar and it was clearly a bad decision. The weather in Chicago sucks so the advantage of the solar is nearly zero.

Considering buying a Prius to replace an aging '99 Honda Accord. I have a question about how the solar roof option operates. For example, living in AZ, when I park the our Honda outside, I have the sunroof closed, with the interior sliding panel ???

The Prius MPG is rated the same with or without. I bought my Prius for the power sunroof, not for the solar panel. But they come as a package. Keep in mind that the solar panel and sun roof are not linked in operation. #4 NineScorpions, Dec 30, 2011. I've got a gen3 Prius with solar roof. I've heard that weight is increased of about 20 kg
