

Can you use solar power in Johannesburg?

With a solar system that is sized correctly, you can rely entirely on the sun for power in Johannesburg, but it is recommended to remain connected to the grid in case of prolonged inclement weather conditions. Should you choose to disconnect from the Johannesburg grid, provision should be made for additional battery storage or a backup generator.

Is South Africa a good place for solar power?

Solar power is also reliable and consistent, and sunny South Africa offers an ideal solar environment. Most areas in the country average more than 2 500 hours of sunshine per year, making South Africa the world's third best solar location after the Sahara and Queensland in Australia. I am writing to recommend the services of Sunworx.

What are the benefits of a solar power system?

Be completely independent of the grid power. 100% Generation and power storage solution. Maintain a grid connection but generate your own power. Power storage and grid power. Supplement your power with solar panels to reduce your electricity bill, no storage. will ensure that your project is completed to the highest international standards.
