How much does a solar roof vent cost?

Solar roof vents with a single fan usually cost around \$600, while the installation will usually tack on an additional \$150 to \$300. The actual price of a solar roof vent will vary based on the performance and quality of the unit you select. Generally speaking, you should keep an eye out for the following features: Does the unit have a fan blade?

How does a solar powered attic vent work?

A smart alternative to conventional roof vents, the Solar Powered Attic Vent operates during the day and collects power from the sun to convert into electricity. In turn, this energy operates a high efficiency motor inside the power vent, so there's no added cost for electricity. That saves energy, which is better for the environment.

How do solar roof vents work?

Solar roof vents, though less powerful, function almost exactly like electric or wind-powered vents. The only difference is that they generate their power from the sun. While a wind-driven vent won't function on a hot, summer day, a solar vent can operate year-round (assuming that there is enough direct sunlight).
