

The four Stor"Sun solar plants located in Trou d'Eau Douce (SS1 and SS2), Balaclava (SS3) and Petite-Rivi?re (SS4) will integrate large scale Battery Energy Storage Systems (BESS) to provide a clean and firm renewable power to the grid.

The projects total 60MWac of solar PV capacity and an unspecified amount of attached battery energy storage. A spokesperson for Qair told Energy-Storage.news that it could only reveal more details about the storage portion once the final design was set, but said it would primarily be load shifting solar and providing grid ancillary services

The calls for expression of interest for the two separate solar-plus-storage capacities are in line with Mauritius' objective of increasing the share of renewable energy in its power generation mix. The Government of Mauritius is planning to increase the use of renewable energy from the current level of around 22%, to 35% by 2025 and to 60% by 2030

To reach these goals, Mauritius has exempted PV projects from VAT and offers net-metering provisions to residential customers implementing systems that do not exceed 5kW in capacity. Plus, there is a green energy scheme for small to medium-sized enterprises (SMEs), offering 2,000 2kWp systems installed free of charge.

French renewable power producer Qair has secured power off-take deals for four hybrid solar and battery storage space projects in Mauritius that will add 60 MW of capacity to the neighborhood electricity grid. Image: Qair. The firm claimed on Friday has authorized power purchase agreements (PPAs) with Mauritius' Central Electricity Board (CEB).

Island country Mauritius's Government is looking to expand its solar power capacity by 140MW. The Central Electricity Board (CEB) of Mauritius has actually issued 2 different tenders for the development of 140MW of solar-plus-storage capacity. The authority has not defined the different capacity of the storage systems in both projects.
