As residential solar panels are generally rated between 330 watts and 400 watts these days, a 3 kilowatt (3,000 watt) solar system will require about 7-10 solar panels. A typical solar panel is around 1m x 1.7m, therefore a 3kW system will require about 12-17 m² of roof space, depending on the wattage of the panels.

Three pivotal reasons underscore the wisdom of setting up a solar system in Adelaide before the year turned: Declining Rebates from 1st January 2020; As the new year dawned, the government trimmed the discounts offered to Australians investing in solar systems. While the rebates remained, their value shrank considerably.
