

Use these free STEM projects, lessons, and activities to help students get hands-on exploring and learning about solar system science. The Earth, the Moon, the Sun, and space are concepts students identify early on.

With the solar system model project, you can explore the vastness of our universe through creative and interactive hands-on activities. Imagine being able to hold the solar system in your hands, marveling at the intricate details of each planet.

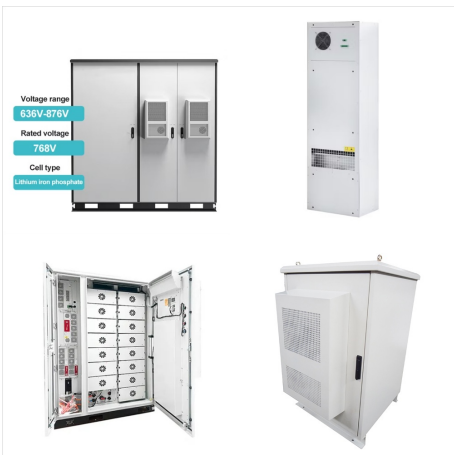

We have, however, come a long way since the days of hanging mobile solar system models (not that there's anything wrong with that). From edible solar systems to large-scale chalk outlines, we found plenty of creative solar system projects to ???

# SOLAR SYSTEM MODEL PROJECT IDEAS

This edible solar system project is a culinary masterpiece that they'll love to create. Have them use different candies, chocolates, and other edible decorations to re-create our solar system. In this delicious journey from planet to plate, they'll craft, decorate, and then savor!

Whether you want to make a solar system project out of fruit, playdough, bottle caps, yarn, clothespins, snow globe, or more ??? we've got the most creative solar system activities to make learning about the planets and stars in our solar system exciting.

Have you ever wondered about the sizes of planets in the solar system or the distances between them? In this project, you will create your own scale model of the solar system by learning how to calculate scale distances, the relative sizes of planets, or both.
