

Are astronomical watches based on the Solar System?

There are even earth focused astronomical watches such as the Ulysses Nardin Tellerium Johannes Kepler. But back to portrayal of the solar system in a watch. Christian Van Der Klaauw is one of the leading guys pushing the more recent utilisation of astronomical complications into clocks and watches.

Can you have a solar system diorama on your wrist?

You can now have that solar system diorama you made in school on your wrist in the form of a watch. Van Cleef & Arpel have debuted a gorgeous new astronomical watch, the 44mm Midnight Planetarium, at Geneva's annual Salon International de la Haute Horlogerie.

Are Astronomia solar watches accurate?

For example, the positions of the planets are not accurate, unlike, say, Van Cleef & Arpel's Midnight Planetarium watch, but compared to the Midnight Planetarium, the Astronomia Solar offers instant gratification in the way of its quick spinning bi-axial tourbillon and its dial, which is constantly changing positions and in motion.

What is the best Astronomia solar watch?

The tourbillon beats at 4Hz, and the JCAM19 has a power reserve of 48 hours. It is immaculately finished too, with sand-blasted and beveled bridges, circular graining on the gear train components, and polished countersinks and screws. For visual appeal and as a statement piece, the Astronomia Solar watch has few equals.

What does a Jacob & Co Astronomia solar watch represent?

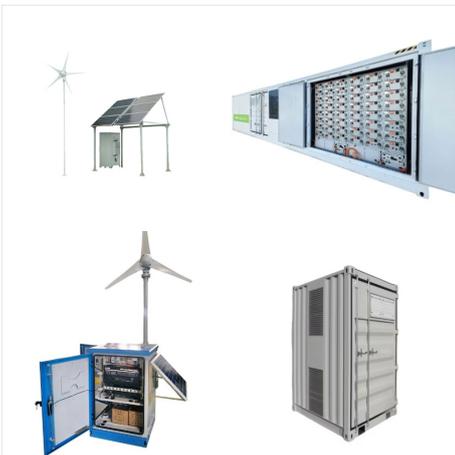

With the Astronomia Solar, Jacob & Co. wanted to create a model of our solar system in a watch. So in the middle of the dial is a large 1.5 carat Citrine crystal in a Jacob Cut that represents the sun. Jacob & Co. also uses three other stones in amethyst, garnet, and smoked quartz to represent other planets.

How much does a solar system watch cost?

This solar system watch took 396 pieces and three whole years of work to complete so, along with the precious stones dotting its surface, the \$245,000 price tag comes as no surprise. However, it seems fair for owning your own little planetarium watch!

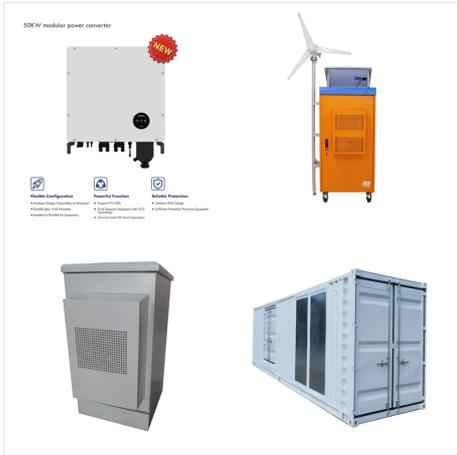

Midnight Planetarium is an incredible timepiece that features six bejewelled planets in our solar system accurately rotating around our Sun.
