All Reolink battery-powered cameras come with a micro-USB or a USB-C cable. You can charge the battery by the USB cable directly while plugging into the USB power bank or PC USB port. Normally, it's suggested to connect the USB cable with a 5V/2A wall plug and plug it into the electrical outlet to charge the battery.

Connect the negative (black) wires to the negative point. These wires will link the solar panel to the battery pack and charger. Finally, cover the connections with tape to keep them safe. The next step is putting together the battery pack for your solar-powered USB charger. This part is key. It stores the power the solar panel gathers.
