How to increase solar energy in Cameroon?

In order to enhance solar energy in Cameroon, the government recently signed an agreement with China to carry out feasibility studies aiming at installing several light points in Yaounde. Recently, Cameroon obtained eKiss (energy-keep it simple and safe) mobile off-grid photovoltaic systems from Antaris Solar.

Does Cameroon have good solar potential?

There is good solar potential in Cameroon (see Fig. 5) but it is not well developed. The major cause of the poor state of solar energy development is the poor commitment and dedication of government in taking important steps to boost the sector. In most part of the country, the mean solar irradiance is approximately 5.8 kWh/m²/day.

Why do we need solar power plants in Cameroon?

The absence of commitment and enthusiasm from the government is weakening the sector potentiality to be developed either by private sector investments and also foreign investors. Solar, wind and thermal energy plants are essential to meet the electrification of Cameroon.
