

This constraint on proportions, Cé rè de said, was one of the more interesting problems that had to be solved during the design and development of the SolarBeat Tank. I think it's a great development and a further step in the direction Cartier first established with the original Must de Cartier watches, back in the 1970s.

What is the Cartier SolarBeat?

The Cartier SolarBeat is a technical innovation of Cartier's whose Roman numeral markers have subtle and invisible perforations that allow solar energy to pass through and reach the photovoltaic cells placed underneath the watch's dial. It is a watch model from Cartier.

What is the Cartier Tank SolarBeat?

The Cartier Tank Must SolarBeat is one of the more striking models released under the Cartier Tank Must name. It is significant because it preserves the DNA of its predecessors while also integrating new, cutting-edge technology with its photovoltaic watch calibre.

What is a solarbeat tank must?

The SolarBeat Tank Must is the most practical Tank yet, sure, but it's also a great way to connect to a piece of real watchmaking history - and no less beautiful for being affordable. For more, click here. Visit Hodinkee affiliate Crown & Caliber to shop pre-owned Cartier models. It's the dawn of a new era.

Is the tank must solarbeat a good watch?

It's an elegant watch, and Cartier understands very well that an elegant watch shouldn't be big. Together with a mere 6.6mm thickness (or slimness), the Tank Must Solarbeat has a sleek appearance on my wrist. That said, it helps if the rest of one's outfit is somewhat aligned.

What are the Cartier SolarBeat watches made of?

The Cartier SolarBeat watches have a crown made of stainless steeland a blue synthetic spinel cabochon. They come with clean silver or white dialswhich are furnished with classic blued steel hands and Roman numeral indices.

The watch features their SolarBeat photovoltaic movement that feeds off of solar power to charge the watch and has a lifespan of over 16 years. The watch is charged through solar energy that is fed through small perforations in the dial's Roman numerals to power the photovoltaic cells underneath. The company also created a new strap that uses

Steel case, beaded crown set with a synthetic cabochon-shaped spinel, silvered dial, blued-steel sword-shaped hands, black strap (made without animal materials), steel ardillon buckle. Case dimensions: 33.7 mm x 25.5 mm, thickness: 6.6 mm. Water-resistant to 3 bar (approx. 30

A true technical feat that relies on the delicate and invisible perforation of Roman numerals, whose openings allow solar energy to reach the photovoltaic cells hidden under the dial. It took two years for the development team to integrate this SolarBeatTM movement, with a lifespan of over 16 years, into the Tank Must, the first watch to

PHOTOVOLTAIC PRINCIPLE A research hub and innovative laboratory, the Manufacture has succeeded in applying the photovoltaic principle to the Tank watch's dial without altering its aesthetic. It took two years for the development team to integrate this SolarBeatTM movement, with an average lifespan of 16 years, into the Tank Must, the first

It depends on the subtle and invisible perforation of the Cartier SolarBeat's Roman numeral markers, whose openings allow solar energy to pass through and reach the photovoltaic cells placed underneath the watch's dial. This enables the Cartier SolarBeat to be charged using solar energy, so that it can run for up to 16 years. 2.

The biggest change with the new Tanks, and the one I"m most excited about, is the introduction of a SolarBeat photovoltaic movement, available for the Small and Large sized models. As the logic goes with most Tank models, a quartz movement is the perfect choice. You get all the benefits of accuracy, longevity, much less servicing, and

The Tank Must Solarbeat fully proves Lex's point of why it makes sense to add solar power to luxury quartz watches. Combined with the improved quick-release system and those slots in the lugs, Cartier has introduced a Tank that's way ahead of its time! Possibly due to issues in supplying parts for the solar movement. Reply. Anders says

Quick Take. So far, Watches & Wonders has brought us some genuine surprises, and not the least of them is the new SolarBeat movement-equipped Tank Must. The watch is the first solar-powered watch in the Tank collection, but it is also the first solar-powered watch???
