

Where can I buy solarge solar panels?

Solarge's products are available through distributors and directly. "Our scope is worldwide, we have already shipped panels to New Zealand," said Vesseur. Solarge inaugurated its first large-scale production line for lightweight solar panels with a low carbon footprint in May.

Where is Solarge based?

Solarge is based in Eindhoven. They use the extensive network of high-tech companies in the area and have an R&D/production facility there. Solarge is currently developing a fully automated production line for volume production, which will be commissioned in mid-2021.

Why should you choose solarge?

At Solarge, we believe in the power of the sun for a livable earth. Using our solar panels is a sustainable way to generate electricity, even on roofs with less load capacity. The solar panels are produced with low CO₂ emissions and are free of PFAS. In addition, they are fully recyclable, so that we can reuse all raw materials.

Will Solarge expand in the Netherlands?

Solarge anticipates strong growth in the Netherlands for solar integration. This growth encompasses several dimensions: esthetic integrations in the built environment, proper integration into the electricity grid, and cost reductions necessary for future expansion.

Are solarge solar panels recyclable?

Solarge is a manufacturer of sustainable, fully recyclable lightweight solar panels. The PV modules of Solarge, developed with groundbreaking technology based on thermoplastic polymers, are 50% lighter compared to traditional glass-solar panels, 50% faster to install, and 100% recyclable. Where is Solarge's headquarters?

What makes Solarge a lightweight solar module?

Solarge's lightweight solar modules are made using fiber reinforced polymers and a set of materials developed and patented by SABIC. This new technique allows Solarge to utilize the best solar cells currently available and in the future.
