

Why are Syrians using solar panels?

Cut off from the power grid and with fuel costs soaring, Syrians in a poor, embattled enclave have turned en masse to solar panels to charge their phones and light their homes and tents. Solar panels covering rooftops, some of which have been damaged in government attacks, in Binnish, Syria.

How many solar panels are there in Syria?

Syria's state electric company announced the completion of another solar project yesterday. A 1-megawatt solar power station in the town of Autan has been connected to the electrical grid. The station features 10 inverters, which convert energy to electricity, and 1,818 solar panels, the state-run news outlet SANA reported today.

Are solar panels a viable alternative energy source in Syria?

As an option that seemed to be one of the best alternative energy sources in Syria, reinforced by the absence of fuel, the spread of solar panels began in most regions, respectively, years ago, amid "government" support and adoption of this trend.

Are solar panels a better option than losing electricity in Syria?

According to an opinion poll conducted by Enab Baladi, a number of Syrians residing in various governorates considered that alternative energy through solar panels is a better option than losing electricity despite its high costs and regardless of the controlling parties.

Where are solar panels located in Syria?

Solar panels, big and small, old and new, are seemingly everywhere in Idlib Province along Syria's border with Turkey, rigged up in twos and threes on the roofs and balconies of apartment buildings, perched atop refugee tents and mounted near farms and factories on huge platforms that rotate to follow the sun across the sky.

Where does solar energy come from in Syria?

The use of solar energy spreads from northwestern Syria, which started relying on solar power around 2016, passing through areas in the north-east, ending with the areas under the control of the Syrian regime, which directed a clear trend to generate electricity through them, not only in large industrial facilities but even in homes.

Solar power for Syria. Syria's power grid has been decimated by years of war, leaving millions with unreliable energy. The Union of Medical Care and Relief Organisations (UOSSM) has begun a project to install solar panels on hospitals to ensure that there is always power where it is needed most.

In 2017, solar panels in Syria began to supplant generators as locals' main source of electricity. However, locals did not use solar panels out of ecological concern. People just needed an affordable source of electricity because the fuel to power generators became prohibitively expensive.
