A solid wood fence is versatile and graded on the quality of its appearance. Post: Vertical component, set in the ground, that provides the main support for the fence. Pickets: Vertical panels that attach to the rails and provide screening. Depending on the fencing you select, there are other common parts such as:

Why is cedar fencing so popular? Forty years ago, cedar fence boards were rich with dark red, brown and orange hues. The boards had a strong cedar smell that was so pungent that you might have thought you were locked in your grandmother's cedar closet. Back then, cedar fencing came from old growth cedar trees.

Classic solid fencing panels have an overall thickness of 50mm with an 80mm top capping. The posts measure 180 (face) x 120mm. Each standard wall section has an effective length of 2.53 or 2.83 meters, measured post center to post center.
