

Is solid power looking for a new CEO?

Louisville-based Solid Power is looking for a new CEO after Doug Campbell announced his immediate resignation. The company is developing and producing solid-state battery cells for electric vehicles. By Judith Kohler | jjkohler@denverpost.com | The Denver Post

What happened to Doug Campbell?

Doug Campbell has resigned as CEO of Louisville-based Solid Power, a developer of solid-state battery cells, which are considered the next evolution in electric-vehicle technology. Campbell also resigned Tuesday from his position on the board of directors. His resignation was effective immediately.

What does solid power do?

Solid Power has demonstrated its ability to produce and scale next-generation all solid-state batteries that are designed to power longer range, lower cost and safer electric vehicles using existing lithium-ion battery manufacturing infrastructure.

Is solid power a solid-state battery company?

Solid Power's leadership in all solid-state battery development and manufacturing has been confirmed with the delivery of hundreds of production line-produced battery cells that were validated by Ford and the BMW Group late last year, formalizing Solid Power's commercialization plans with its two long-standing automotive partners.

Which companies have backed Solid Power?

Solid Power is backed by several prominent investors, including Ford, BMW, Hyundai, and Samsung. Roland Berger Partner Wolfgang Bernhart recently spoke with Campbell about Solid Power's USD 1.2 billion valuation, what distinguishes its battery technology from others, and how it impacts the supply chain.

Who makes solid power batteries?

Solid Power has partnerships with BMW and Ford Motor Co. to jointly develop all-solid-state batteries. In 2021, the company announced plans to join with SK Innovation to produce its automotive-scale all-solid-state battery cells using Solid Power's sulfide-based solid electrolyte.

3. Doug Campbell is the co-founder of Solid Power. Mr. Campbell not only serves as the executive leader in charge of Solid Power, but he is also the co-founder and part-owner of the company. Solid Power is a spin-off enterprise of the University of Colorado Boulder.

My decision to step down as Solid Power's CEO made in November, 2022 was a quick one. Further, I was scheduled to close on my new home in Albuquerque just after New Year's Eve. That left me with a very quiet two-month period of packing up my Longmont house and beginning the long and slow journey of regaining at least a portion of my fitness from my ???

Bloomberg Batteries Are The Biggest Cost Driver in EVs: Solid Power CEO. Contact Us 486 S. Pierce Ave., Suite E Louisville CO 80027 (HQ) 14902

I am an Albuquerque native and seasoned entrepreneur & startup veteran. I founded Solid Power in 2011 and established it as the industry leader in all solid-state rechargeable batteries for the EV market. I led the company through its transition from a University of Colorado R& D project to a publicly listed company (NASDAQ: SLDP).
