

Who makes the ElectraMeccanica Solo EV?

Another small, relatively unknown electric automaker trending up on the stock exchange is small Canadian upstart ElectraMeccanica, maker of the new ElectraMeccanica Solo EV. What Is the 2020 ElectraMeccanica Solo? The Solo is a sub-\$20,000, one-passenger, three-wheeled EV designed for cheap, efficient city transportation.

What is the ElectraMeccanica solo?

The ElectraMeccanica Solo is a single-passenger, three-wheeled, battery electric vehicle, produced by ElectraMeccanica from 2018 to 2023. Initially, at the time ElectraMeccanica was founded in 2015, the concept of a three-wheeled small electric car was intended to take the form of implementing an existing project.

How much does a Solo EV cost?

The SOLO EV can be had for \$18,500. Thankfully, all of the talk about range anxiety in those early days of the electric car is pretty much moot now. Most electric vehicles can travel at least 200 miles on a full charge. After a few short trips close to home in the SOLO EV, I started to wonder how far I could stretch its 100-mile range.

What is a Solo EV?

ElectraMeccanica Vehicles Corp. (\$SOLO) is an EV designer and manufacturer based in Vancouver, BC, that has been developing its three-wheeled, single-passenger EV called the SOLO since 2015. The SOLO EV was specifically designed with commuting and deliveries in mind, as its compact size makes it perfect for urban conditions.

Is ElectraMeccanica solo a good EV?

Electrek recently got the opportunity to test out the ElectraMeccanica SOLO EV for a few days and see what this single-passenger vessel can do. Small but speedy, the SOLO offers fun for single-rider drivers, and a picture-worthy experience for anyone you drive past.

When will ElectraMeccanica deliver a Solo EV?

Last October, ElectraMeccanica began delivering its flagship SOLO EV to customers and has continued doing so for both consumers and commercial fleets since. It will soon be followed by a Cargo version offering twice the capacity, scheduled to begin deliveries in Q2 of this year.

The first deliveries of ElectraMeccanica's SOLO EV may feel like d?j? vu. In fact, we covered a similar story back in 2018 when the company made an initial delivery announcement for Los
