

What is the solplanet app?

Simple remote management supporting multiple users The Solplanet App is the most intelligent and user-friendly mobile solution for monitoring your PV installation's power generation. Featuring intuitive data visualizations, it enables you to effortlessly track energy production and monitor progress over time.

What is solplanet cloud based monitoring?

Our cutting-edge cloud-based monitoring system empowers you to monitor real-time energy generation via the Solplanet Cloud, offering unparalleled accessibility from anywhere. Live data reporting ensures proactive system performance management, swiftly detecting and addressing potential issues.

How does solplanet work?

The app provides real-time data on energy generation and consumption, allowing users to track their energy usage and make adjustments to optimize their energy consumption. Additionally, Solplanet comes with a comprehensive dashboard that displays all the important information about the inverter, such as power output, voltage, and current.

Does solplanet support third party dataloggers?

Yes, Solplanet inverters support third party dataloggers such as Solarlog, Meteocontrol and Solarman. In addition, for large PV plants, we can offer our protocol to a third party company to develop their own customized monitoring solution. Can I obtain weather data from the Aiswei Cloud?

Why should you choose solplanet?

The live data feed directly from Solplanet's Cloud Service assures accurate and up-to-date information you can rely on from anywhere. All your data in a single, secure location The power of the sun is the future of our planet. Solplanet makes solar for everybody. Easy-to-install, reliable and user-friendly inverters.

Can I export a smart meter to a solplanet inverter?

For Solplanet residential inverters, you also can have export control solution through connecting the defined smart meter directly to the inverter via RS485 and enable this function on APP. For more details, please refer to the user manuals or contact our service for support. Can I oversize the PV array with respect to the

Effortlessly integrate the Wi-Fi stick with the inverter, launch the Solplanet app, and establish an internet connection to unlock the powerful monitoring capabilities. This user-friendly solution ensures a straightforward and efficient process, providing users with instant access to vital information for a comprehensive monitoring experience.

Os inversores Solplanet nao podem ser usados com modulos de filme fino, que requerem um aterramento funcional no condutor CC positivo ou negativo. Nestes casos, sugerimos o uso de um inversor isolado (com transformador). Nossos inversores nao isolados (sem transformador) sao normalmente projetados para modulos solares de silicio.

Monitoring the data from your solar installation just got easier, thanks to our new LAN/WLAN Ai-Dongle monitoring device. Our easy-to-use Ai-Dongle can enhance your Solplanet's inverter data monitoring and grow your ability to keep track of your installation's energy production that you can monitor 24/7 using our user-friendly mobile application.
