South Korea installed 1.2 GW of solar in the first half of 2024, according to the Korea Energy Agency. It says the nation will deploy between 2.7 GW and 2.8 GW of PV capacity this year, continuing

For instance, it was the first municipality in South Korea to pay a city-level subsidy for small solar power plants with an output of 50 kW or less, since the nationwide feed-in tariff was abolished in 2011 due to the related fiscal burden. Subsidies are in place for the installation of mini-solar panels, reducing the upfront cost by 80 per cent.
