How many solar panels are there in southern Oregon?

Since 2010, True South Solar has completed more than 1,100 solar panel installations - exclusively in Southern Oregon. As you can see on this interactive map, many of these installations were made in your neighborhood or town. Why do we only work in Southern Oregon?

How much does solar cost in Oregon?

The average price per watt of solar power in Oregon is \$2.64/W. These prices are before incentives. After the federal solar tax credit, the final cost will drop by 30%, down to \$21,063 for a 11.39 kW system. Many states even offer local rebates and incentives that lower the price further--sometimes by thousands of dollars.

Should you switch to solar energy in Oregon?

If you're considering a switch to solar energy, the state of Oregon offers a range of incentives to make the transition even more enticing. These incentives not only help homeowners embrace clean energy but also contribute to reducing energy bills and promoting environmental sustainability.

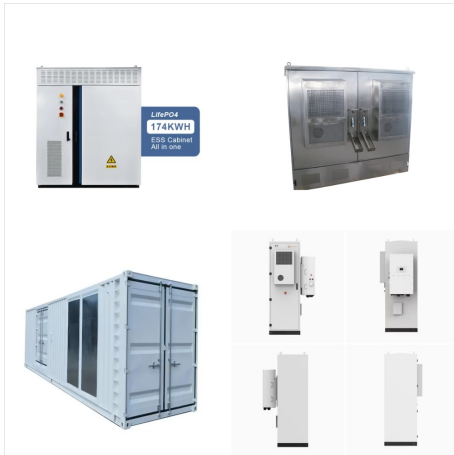

Does Oregon have a solar tax credit?

The Investment Tax Credit (ITC) or Residential Clean Energy Credit offers a 30% tax credit for PV solar systems. This applies to those purchasing systems outright, but does not apply to leases. Oregon's net metering policy allows homeowners to receive credit for excess energy produced by their solar systems, further reducing energy costs.
