

What is ViewSpace?

ViewSpace is a free, web-based collection of digital interactives and videos highlighting the latest developments in astronomy and Earth science. ViewSpace gives you the opportunity to explore our planet, solar system, galaxy, and universe.

Who makes ViewSpace?

ViewSpace is produced by the Office of Public Outreach at the Space Telescope Science Institute, in partnership with the NASA's Universe of Learning project and NASA's Earth Observing System, Hubble Space Telescope Project, and James Webb Space Telescope Project.

What is a ViewSpace interactive?

ViewSpace interactives allow you to explore objects and materials from different perspectives, discovering how we can combine information to better understand the universe.

Where is ViewSpace exhibited?

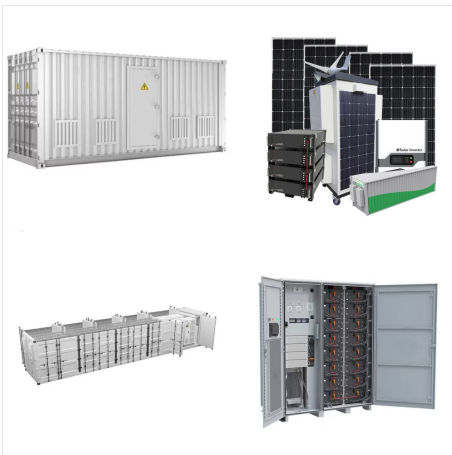

ViewSpace has been exhibited in museums, planetariums, and science centers across the country since 2000.

For the past 30 years the Hubble Space Telescope has continued its important mission of uncovering the mysteries of the universe. One of those mysteries that Hubble has helped us understand are exoplanets. Watch. Discover the ???

Solar System Scope is a model of Solar System, Night sky and Outer Space in real time, with accurate positions of objects and lots of interesting facts. We're always trying to improve and add new features both to Solar System Scope Application and Website, as well as listen to your ideas - so together we can make the best Space model ever

Thankfully, there are plenty of astronomy websites dedicated to the world outside our own, where you can track comets, see the stars, and read about the latest scientific discoveries. 1. HubbleSite. In 1990, the space shuttle Discovery released the Hubble Space Telescope into space. It provides images from deep space, revealing incredible

The Hubble Skymap puts the night sky at your fingertips any time of day. Roam the Milky Way to find a selection of galaxies, stars, nebulae and more, and click for a Hubble's-eye-view of each object. To explore the skymap, scroll, double click, or ???

Previously hosted on the Discover website, Bad Astronomy now lives at slate , and to describe Bad Astronomy as a blog that publishes "interesting and thought-provoking stories", as one reviewer put it, is to do it a major disservice. The internet is full of sites that publish half-truths and outright garbage about any subject one can
