

On March 1, the Sri Lanka Sustainable Energy Authority, the Government of Sri Lanka, and U-Solar Clean Energy Solutions from India signed an agreement for the construction of hybrid renewable energy systems on Nainativu, Delft (Neduntheevu), and Analaitivu islands situated in the Palk Bay.

On September 14, USAID, in collaboration with SLSEA through its Sri Lanka Energy Program, introduced the National Energy Benchmarking Portal (NEBP). This innovative platform is designed to assist businesses in curbing electricity consumption by promoting efficient practices and conservation methods, thereby addressing the challenges posed by

4 ? SLSEA - Sri Lanka Sustainable Energy Authority. As the governing body responsible for pioneering the sustainable energy revolution in Sri Lanka, we aim to facilitate the development of our nation's rich energy resources, including solar, wind, water and bioenergy.

As Sri Lanka faces an escalating energy crisis, it is imperative to explore sustainable energy solutions that secure our nation's future. On National Energy Day, 26 June 2024, Enricher Holdings Ltd., a leading solar solutions provider with over 13 years of experience, emphasises the importance of collective efforts in overcoming this crisis.

By 2030, enhance international cooperation to facilitate access to clean energy research and technology, including renewable energy, energy efficiency and advanced and cleaner fossil-fuel technology, and promote investment in energy infrastructure and clean energy technology.

From a consumption perspective, energy demand in Sri Lanka has continued to rise - showing a considerable increase over the past 20 years. Research conducted has led us to believe an increasing share of renewable energy in the energy mix of a country can help meet the growing future demand for energy while influencing economic development.

What are the main sources of renewable heat in Sri Lanka? Share of renewables in energy consumption
Renewables are an increasingly important source of energy as countries seek to reduce their CO2 emissions and dependence on imported fossil fuels.
