

Travel back to the Union Bridge location where you can enter the Ceto Transit Gate. Once you're out on the other side, you'll have a new companion, the HIVE unit. The Autonomous Cargo Dispatcher is a useful upgrade if your inventory often gets too full.

Ceto Transit Gate is a site in the EMP Fields region of the Union system in Everspace 2. This location is the first Union location visited - it has several G& B structures including cargo transit processing, and has a Jump Gate to the ???

Union Bridge is a site in the Home Turf region of the Ceto system in Everspace 2. One of the bean bags for the Edge of the Universe is located here, as well as the Primesense STA from the Trading Outpost for the In Transit main mission, which is also the source for the The Good, the Bad, and the Decent side mission.

ST VINCENT AND GRENADINES CETO TRANSIT GATE ENERGY SPHERE DISPENSER

there is a secure chest and a energy sphere socket, i couldnt find the dispenser. also there was a heat(red) sphere one but that wasnt fit and its 7km away even that i manage to reach it with teleport and booster. pls can some one ???

When you pick up the sphere, start flying to the left side of the tower (it has the sphere energy dispenser) and boost until you can reach the activator switch. You'll get it, I'm sure! Reply reply

ST VINCENT AND GRENADINES CETO TRANSIT GATE ENERGY SPHERE DISPENSER

Facing the heat sphere generator, fly high upwards and towards the right u will see a wall structure set into the rock. There is a destructible panel on the side of this wall. Inside will be a bulletproof container and a secure container that opens with the heat sphere.

When you enter Union through the gate there are two massive asteroids on your left. The first one has a small base in it which contains a secure container and an energy sphere socket. I cannot see a energy sphere dispenser anywhere near the base or in any of the other structures in this area. Am I missing something really obvious? Thanks
