

What services does the new Gibraltar power plant offer?

Full Operation & Maintenance Service so as to operate and maintain the new Gibraltar's state of the art dual fuel Power Plant, ensuring its continuous operation, which includes the management system and procedures implementation. Energy solutions designed and engineered by a team of experienced experts in the field.

How many power stations are there in Gibraltar?

There are currently three installations in Gibraltar producing energy. Two of these installations namely Waterport and OESCO power stations supply electricity to the civil population,...

Does Gibraltar have electricity?

Until recently, Gibraltar's electricity supply was dependent on some 40 diesel-powered engines and turbines distributed across Gibraltar. In 2019 a new, modern power station situated at the North Mole commenced operation running long term on liquid natural gas (LNG).

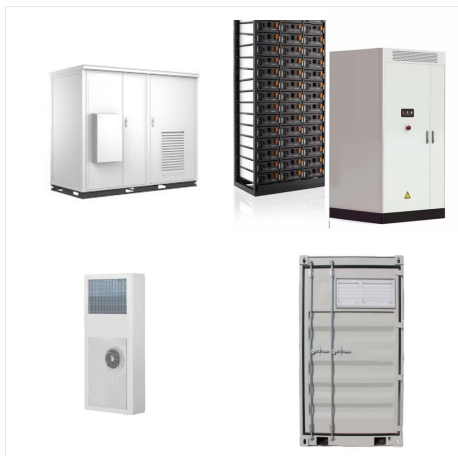

What does LNG stand for in Gibraltar?

In 2019 a new, modern power station situated at the North Mole commenced operation running long term on liquid natural gas (LNG). This secures Gibraltar's energy supply economically, environmentally and sustainably.

Is Gibraltar a sustainable country?

At present, Gibraltar is very dependent on the importation of fossil fuels for energy production and in order to reach the 2020 targets, strategies and measures based on sustainability, improved efficiency and security need to be implemented. Guidance documents are also available to aid in the implementation of Articles within the EED.

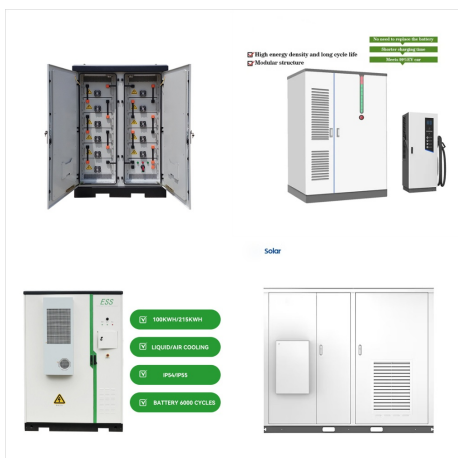

STOCKAGE D'ÉNERGIE GIBRALTAR

Comprendre comment la production électrique a évolué en Gibraltar depuis 1990. Faites vous une idée basée sur les données de Low-Carbon Power et observez l'évolution vers le bas-carbone.

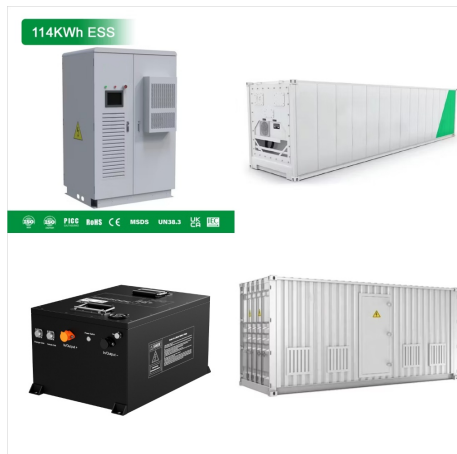

La centrale ECOWAVE a été construite sur une ancienne digue de stockage de munitions datant de la Seconde Guerre mondiale qui se trouve au pied du rocher de Gibraltar. Des flotteurs conçus sur mesure sont attachés à l'ouvrage à l'aide d'articulations robustes.

Le déchargement du 4 réservoirs qui effectueront le stockage pour l'approvisionnement en GNL ont été réalisés et permettront d'atteindre une capacité de stockage d'environ 4 080 mètres cubes et un volume d'énergie générée par an dans l'installation pouvant atteindre jusqu'à 1 100 GWh/an .

STOCKAGE D'ÉNERGIE GIBRALTAR

WinPower was chosen by GEA (Gibraltar Electricity Authority) to continue the full Operation & Maintenance Services of the Gibraltar New Power Plant (NMPP), including commissioning assistance as performed to Bouygues Energies & Services for the last two years.

Les annonces d'appels d'offres solaires par Gibraltar et l'aéroport de Fiumicino ? Rome illustrent la reconnaissance croissante de l'énergie solaire dans les infrastructures aéroportuaires.
