Energy in Sudan describes energy and electricity production, consumption and imports in Sudan. The modern system dates from 1925 with the establishment of the Sudan Light and Power Company, an enterprise financed and managed by British entrepreneurs but owned by the Condominium government. approximately 315 miles southeast of Khartoum.

About GEO. GEO is a set of free interactive databases and tools built collaboratively by people like you. GOAL: to promote an understanding, on a global scale, of the dynamics of change in energy systems, quantify emissions and their impacts, and accelerate the transition to carbon-neutral, environmentally benign energy systems while providing affordable energy to all.

Employees are a large part of the continued success of Energy Systems Southeast. We strive to hire employees who can contribute to the company by putting our customers first - while focusing on stellar communication and teamwork. In exchange we will provide opportunities for growth within the company, technical training and a comprehensive benefits package.
