

In August, the Bureau of Overseas Buildings Operations (OBO) installed its first ever large-scale renewable battery energy storage system at the new U.S. Embassy in Niger. The installation enhances the campus's energy efficiency by maximizing the storage and use of solar power and marks a crucial step in the Department of State's efforts to

battery research and development with a particular focus on Lithium-ion batteries. It is expected in the long run that lithium-ion batteries would be produced locally for rechargeable lanterns in
