The SunSmart solar power system was initially conceived as a response to the growing demand for and use of electric vehicles (EVs). Traditional internal combustion engine (ICE) vehicles are a leading cause of pollution and global climate change. Experts estimate that unless we replace at least 25% of ICEs with EVs, our global tipping point is

Save yourself the complexity and hassle of traditional solar systems. The SunSmart solution needs only a few square feet of direct sunlight ??? and its panels are automated to track to the sun's position and angle. + All you need is a small patch of light.

????Plug & Play your electrical appliances, Anytime,Anywhere ?????,?Generate savings from electricity bills, ?????Utilize it as a smart alternative source of clean energy by simply charging your i-MoGen freely and infinitely via SOLAR PV PANEL or back up charging via AC. Living Off the Grid made Possible. Be Ready.

In typical grid-tied or off-grid load generators, electrical demand for residence (or other load type) is often at the opposite phase from available solar radiation. Simply put, energy should be stored within a closed system and available on demand ??? not just when the sun is shining.
