Our mission is to empower individuals by providing affordable solar panels for all budgets and addressing our environment crisis. You think you don't have enough money for upfront solar investment? Apply for a loan to get the 26% Federal Tax Credit. You can lock in a fixed rate loan that will save ???

This listing is for 250W solar panels. These are used panels. They have developed a cosmetic blemish known as a snail trail. This does not affect the output of the panel. Manufacturing labels have been removed. Panels have been tested and have good output. These would need to be for off-grid applications. Due to constantly changing stock, these panels may come with silver ???

This is a listing for 26 of our used 240W panels. The manufacturer labels have been removed from these panels, for that reason, they are suitable for off-grid applications. Panels have been tested and have good output. The vinyl has airside cracking (backside), but have no signs of any moisture intrusion on the panel. The EVA moisture barrier appears to be intact. (see pictures ???

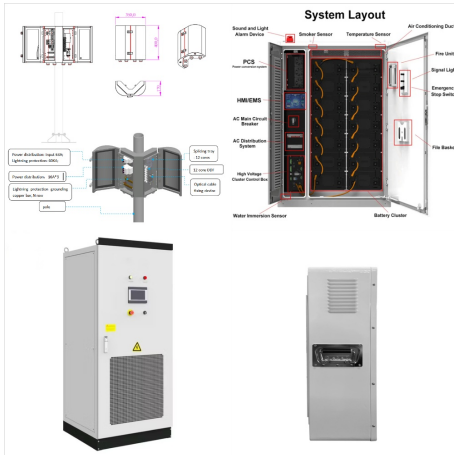

This is part three of our new series on installing your own off-grid solar system. Picking the right panels is such a crucial step in the solar system process. Our technical specialist helps walk us through how to pick panels that will give you the power to run everything you need! ???? ,? Stay tuned for the rest of the series!

SanTan Solar: Cheap, New & Used Solar Panels.
We did a LOT of research when trying to decide what solar panels to use for our RV solar system and ultimately decided to go with SanTan ???

Installing solar panels is an exciting venture that many homeowners find rewarding for their wallets, communities and the planet. Fortunately, there are lots of solar companies in San Tan Valley as a result of encouraging government support and a growing clean energy market.

Hello everyone, I just received my panels, 250w T series snail trails, from Santan Solar. The package was undamaged, and I tested the panels immediately after unpacking. It was between 11am-noon, sunny, hot, about 100f degrees. I tested one panel at a time, laid flat on some unistrut, on a

Discover the SunPower difference with Nova Energy, Arizona's leader in solar technology. Start your sustainable energy journey with us today

The only solar panels I have seen anywhere near us (other than 100w panels at Harbor Freight) appear to be the used 240W Trinas from Santan. One of which I bought, for \$100. So far, the highest output I've seen is around 195W, which I thought was actually not too bad. K. Kornbread Solar Addict. Joined Sep 16, 2021 Messages

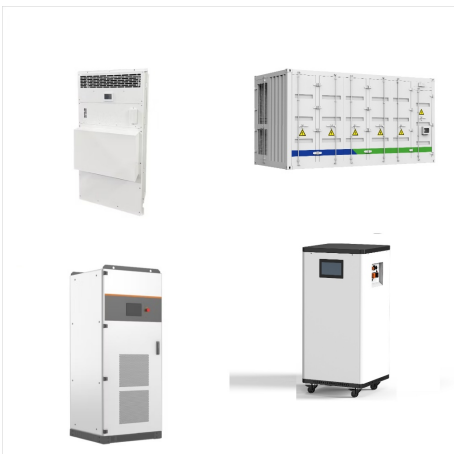

Our solar panels and all of our solar equipment is backed by factory warranties.
