

Who owns Sunergy Cameroon?

The power plants are owned and operated by its daughter company SunErgy Cameroon Ltd. Bundled with electricity, SunErgy also offers cable TV. SunErgy in Cameroon has not only built and is operating solar power plants but also has experience as an EPC to share its experience and expertise with others.

How to increase solar energy in Cameroon?

In order to enhance solar energy in Cameroon, the government recently signed an agreement with China to carry out feasibility studies aiming at installing several light points in Yaounde. Recently, Cameroon obtained eKiss (energy-keep it simple and safe) mobile off-grid photovoltaic systems from Antaris Solar.

Does Cameroon have solar energy?

During the last few years, several studies have consistently established that the entire territorial distribution of Cameroon is endowed with a great potential of solar energy, noticeably with about 900 trillion kWh of solar energy reaching its land per annum.

Why is solar energy a problem in Cameroon?

The solar energy is at pilot stage now in Cameroon. There are several issues that are hindering the process. The Government has not taken necessary steps to enhance the sector. This may be due to the high capital cost of solar technology. There is also lack of sensitization by the government towards the public on the benefit of solar energy.

What is the main energy source used in Cameroon?

The main energy source used in Cameroon is still biomass. For cooking and heating purposes, the majority of Cameroonians still rely on biomass, which is abundant and to certain extends renewable and affordable. Electricity and gas are still very lowly used, mostly because of non-availability and non-accessibility, especially in the rural areas.

What is the energy mix in Cameroon?

According to the Cameroon Energy Situation (SEC) in 2011, the energy consumption mix was 73% biomass, 20% oil and gas products and 7% electricity totaling around 6000 ktoe (Kilo tons of oil equivalent) for the whole country and converted to about 0.3 toe (tons of oil equivalent) per capita.
