

Is Sunpro better than ADT?

The solar system has been nothing but issues, previous company sunpro was not much help either. Though since ADT took over it would be better. WRONG. Not much better than sunpro. System faults out at breakers every 6 months and won't reset. Needs a tech to come out and plug in and reset it.

Which solar company should I Choose?

In light of the news of ADT Solar leaving the market, we recommend Palmetto, Sunrun, or Freedom Solar as alternatives. Before deciding on any company to handle your solar project, we recommend thoroughly looking at a provider's website, warranty, customer reviews, and reputation.

Where can I find a certified solar installer?

I.adt.com/solar is the only resource to do this with. And all they have is phone numbers of companies that manufacture products. Like Tesla, which manufactures the Powerwall. It seems that ADT doesn't even have their own Certified Installers (CI) for a variety of solar equipment.
