

Is black sweet potato vine a low maintenance plant?

SolarPower Black Sweet Potato Vine is a dense herbaceous annual with a trailing habit of growth, eventually spilling over the edges of hanging baskets and containers. Its relatively fine texture sets it apart from other garden plants with less refined foliage. This is a relatively low maintenance plant.

Does black sweet potato vine need Facer?

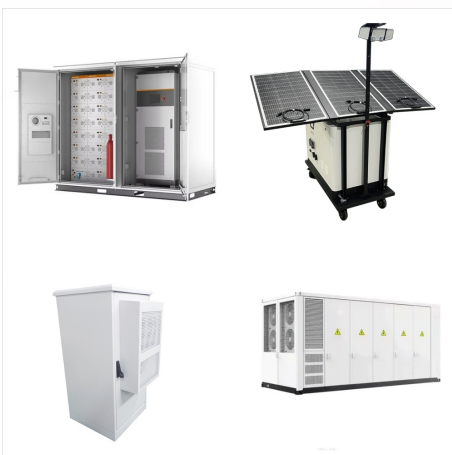

It has no significant negative characteristics. SolarPower Black Sweet Potato Vine is recommended for the following landscape applications; SolarPower Black Sweet Potato Vine will grow to be about 12 inches tall at maturity, with a spread of 3 feet. Its foliage tends to remain dense right to the ground, not requiring facer plants in front.

What does black sweet potato vine look like?

Its attractive deeply cut lobed leaves remain burgundy in color with showy black variegation and tinges of grayish green throughout the season. SolarPower Black Sweet Potato Vine is a dense herbaceous annual with a trailing habit of growth, eventually spilling over the edges of hanging baskets and containers.

How much sun does a black sweet potato vine need?

In hot and dry weather, you may need to water more frequently. Black sweet potato vine thrives in full sun to partial shade. Growing and developing correctly requires at least six hours of direct sunlight daily. If you're planting your vine in a container, place it in a spot where it can get enough sunlight.
