

How much does a solar pool heater cost?

A solar pool heating system usually costs between \$2,500 and \$4,000 to buy and install. This provides a payback of between 1 and 7 years, depending on your local fuel costs and available solar resource. They also typically last longer than gas and heat pump pool heaters. Your actual cost and payback depend on many factors.

Can a solar panel heater heat a pool?

With its large surface area, this solar panel heating kit from Fafco is capable of warming a lot of water. Designed to serve as an above-ground pool heater, the 24-foot-long by 4-foot-wide set of panels produces enough heat to raise a pool's water temperature up to 10 degrees Fahrenheit.

What is a solar pool heater & how does it work?

Solar pool heaters use the sun's energy to pump water through your pool filter and a series of solar collectors -- devices where the water is warmed in tubular panels by the sun. Once warmed, the water is circulated back into the pool.

Can a solar pool heater be placed on a roof?

Because the solar pool heater from the brand Fafco is a large panel, it can be placed on the ground or a nearby rack and roofs as wished. With unobstructed sunlight between the period of 10 AM to 4 PM, this pool heater delivers optimal heating.

What is a large solar pool heater?

Large solar pool heaters consist of panels that must be mounted to a structure, which is typically either a rack that sits on the ground or the roof of a home. Most large solar pool heaters require buyers to purchase installation kits and racks separately, which can add to the overall cost.

Does a solar pool heater have a pump?

The brand Sunsolar is much confident that their solar pool heater contains a lot more tubes within a panel than most other manufacturers on the market. Pool owners do not have to purchase an extra pump because this panel works with existing standard ones.
