

Who is Aleees & Freyr battery?

Aleees and FREYR Battery signs license and service agreement (Photo: Business Wire) Aleees offers complete LFP cathode battery material manufacturing technology and related patents to customers, primarily within the energy storage and EV battery spaces.

What does Freyr stand for?

New York, Oslo, and Luxembourg, October 10, 2022, FREYR Battery (NYSE: FREY) ("FREYR"), a developer of clean, next-generation battery cell production capacity, has entered into an agreement with Aleees (TWSE: 5227), the Taiwan-based lithium-iron phosphate ("LFP") cathode battery material manufacturer.

Where are Freyr batteries made?

FREYR has commenced building the first of its planned factories in Mo i Rana, Norway and announced potential development of industrial scale battery cell production in Vaasa, Finland, and the United States. FREYR intends to deliver up to 43 GWh of battery cell capacity by 2025 and up to 83 GWh annual capacity by 2028.

How much battery capacity will Freyr deliver in 2025?

FREYR intends to deliver up to 43 GWh of battery cell capacity by 2025 and up to 83 GWh annual capacity by 2028. To learn more about FREYR, please visit [About Aleees](#) Aleees (TWSE: 5227), founded in 2005, is one of the few LFP cathode material manufacturers with the longest history in the world.

Why did Freyr purchase a license with Aleees?

By consummating this licensing agreement with Aleees, FREYR is well-positioned to achieve speed and scale of LFP cathode production for our Giga Arctic battery manufacturing plant and beyond. Aleees is one of the best-established LFP cathode producers outside of mainland China and is recognized for their world-class production technology.

How much battery capacity does Freyr have?

FREYR intends to install 50 GWh of battery cell capacity by 2025 and 100 GWh annual capacity by 2028 and 200 GWh of annual capacity by 2030. To learn more about FREYR, please visit [About Aleees](#)
