Solar batteries are really deep cycle batteries that provide energy storage for solar, wind and other renewable energy systems. Different from a car battery, a deep cycle battery is capable of surviving prolonged, repeated and deep discharges which are typical in renewable energy systems that are "off grid" (disconnected from the electric utility company).

I thought the round-trip efficiency of a grid scale molten salt battery was less than 80%. I can't imagine a smaller or DIY version being better than 65% efficient; you really need the thermal mass to make it work unless you go to exotic materials (aka lab scale). GoodWe Hybrid 14KW Solar / Tesla Model 3,Y Battery Module 225KWH ESS jpwhit
