

What do you need for a smart home? To put it simply, you only need two things for a smart home. A mobile phone and home Wi-Fi. You can set everything up in the TESLA Smart app. It connects all TESLA products via Wi-Fi and allows you to control devices and set up automations and individual scenarios.

Tesla and Samsung have partnered to integrate Tesla Solar and Powerwall products into the SmartThings Energy platform. Tesla Energy customers can now manage their home's energy usage, storage, and production all from the convenience of the SmartThings app. The SmartThings app can now display information about energy production, storage and

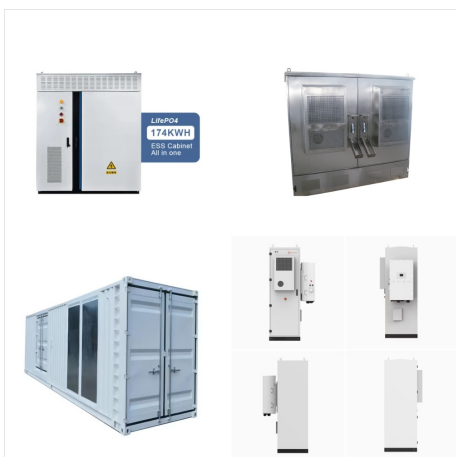

Samsung is teaming up with Tesla and Hyundai to offer deeper smart home and EV controls. The deal will allow owners of Tesla's Powerwall and solar products to monitor their home energy

We provide eco-friendly, energy-efficient smart homes featuring advanced Tesla technology. Our trusted installations include high-quality solar-powered systems and cutting-edge home automation for an innovative living experience.

Tesla uses solar panels that offer a sleek and modern take on traditional panels. With our proprietary mounting hardware, panels can be installed close to your roof without the need for rails, so they blend in with your roofline. Durable and weatherproof, they can power your home for decades to come.

Next-generation smart home in one app. That's what TESLA Smart looks like. An intuitive, user-friendly interface allows you to connect all TESLA smart home elements into one reliably functioning ecosystem. Simply pair your TESLA products with the app and enjoy their great features to the fullest.

There's nothing easier than controlling your entire home from your phone. And that's exactly what the TESLA Smart app allows you to do. Use it to manage all your smart devices. Thanks to automation and scenarios, you can create a smart home that ???
