Currently, Rwanda wants to use its underground for electricity production, expecting it to achieve 48% offgrid and 52 on-grid connections with 512 MW installed power generation capacity from its current 216 MW by 2024. Yet geothermal power plant exists on Rwandan soil, expectations of geothermal energy still remain high in the country.

In the case of large projects, a number of water scarcity/drought management procedures will be available, including taking measures to store fresh water, setting up an alternative energy supply system based on solar or wind power, steps to minimize the overuse of water, and planting of alternative crops (adapt via agricultural management).

When Yariv Cohen MBA2005 co-founded Ignite Power in 2014, it was with a singular mission: to bring nations to 100% clean energy access, starting with Rwanda and enabling remote communities to produce their own electricity. It was a massive challenge, but Ignite's solution was stunningly simple and efficient. Its off-grid systems were designed for domestic use, powered ???
