The planets and the solar system were formed from a huge cloud of gases and dust particles left over when a massive star exploded as a supernova. The gas drifted in space and it's thought that another supernova explosion nearby may have caused a pressure wave to pass through the cloud that caused clumping to occur. As the matter clumped

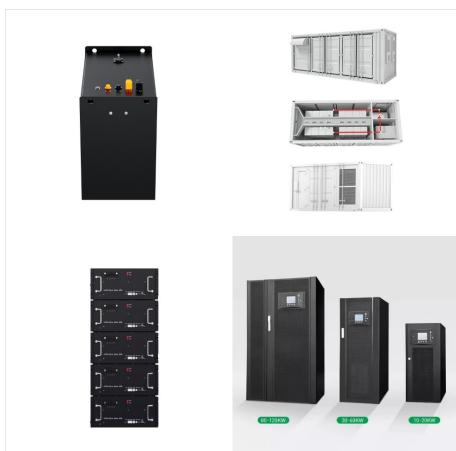

Below is the chart for now. Change the location and the date between 3000 BC and 3000, or tick the "Natal chart inside" box to add a natal chart and get the current transits bi-wheel chart. The following tables incorporate the modern planets, but some astrologers do not count Uranus, Neptune, and Pluto in void Moon calculations. Today's Venus-Mars biquintile is excellent for relating well and smoothly. It's also strong for seeing relating patterns and using them positively to encourage creativity and excitement. However, a

In astrology, current transits refer to the alignment of the planets in their current positions in the sky with your birth chart. Astrologers use these transits to gain insight into prevailing energies a?|

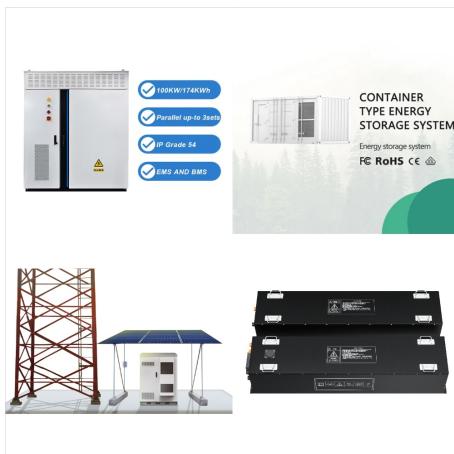

Well the first thing you'll notice is that it's easy to see when there are conjunctions e.g. planets appear close together in the sky. The second thing is that the planets are always shown in the correct zodiac signs. With the standard orrery, if the orbits were not set to be realistic, then the planets would not be shown in the correct sign.

Naka1GBPatras - lunar mansions. A Naka1GBPatra or lunar mansion is one of the 27 divisions of the sky, identified by the prominent star(s) in them, used in Hindu astrology.. Historical (medieval) Hindu astrology enumerated either 27 or 28 naka1GBPatras. Today, a rigid system of 27 naka1GBPatras covering  $13^{\circ}20'$  of the ecliptic each is generally used. The missing 28th nakshatra is Abhijeeta.

The planets that are in transit are the ones that are currently in the heavens. Your birth chart is the map of the heavens at the exact time you were born. The angles between the planets in the sky are known as aspects. Common aspects include conjunctions, sextiles, squares, trines, and a?
