Generally speaking. However, most BMS systems
have an amp rating between 10 and 100 amps. This
range should be sufficient for most applications.
However, if you have specific needs or
requirements, it is always best to consult with an
expert before making your final decision. What Does
100A BMS Mean? A BMS is a Battery Management
System.

Currently I have 2 banks of 4 280a cells. One is
using a 100a Daly bms, and the second is using a
100a JBD. With 4 panels, I was able to work a small
building project for almost 2 weeks with no gas
generator backup. This unit had little to no problem
putting out 200a however the inverter can draw
400a which would be a problem.

Jiabaida BMS JBD Smart bms 3S 4S 200A 100A LiFePO4 Battery PCB with Balance & Optional Uart BT RS485. High quality better service and favorable price with free shipping. The 4S 100A SMART BMS is for LiFePO4 cells only. You must use 4 cells in series and they must be LiFePO4. This BMS is ideal for a 1000W inverter. Features: Using top quality (A-level) protective integrated circuit IC, from Seiko of Japan. The IC itself has power a balancing function. The circuit is simple and reliable
