developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

4 ? Professor Farnan said micro-reactor systems are very well adapted to the situation in Togo where the demand for energy and electricity is changing rapidly. "It is therefore necessary to create a similar West Africa pool for Nano ???

5 ? This was during the West Africa Energy Cooperation Summit (WA-ECS) held from December 3 to 5. In her address, PM Dogb? highlighted Togo's commitment to renewable energy development through ambitious projects. Some of the country's flagship renewable energy projects include Blitta's PV plant, one of the largest in West Africa.

4 ? Professor Farnan said micro-reactor systems are very well adapted to the situation in Togo where the demand for energy and electricity is changing rapidly. "It is therefore necessary to create a similar West Africa pool for Nano Nuclear Energy, and we hope that the signatures observed here today constitute an important step in this direction

Togo: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.
