These systems are part of the Tokelau Renewable
Energy Project that has been funded by the New
Zealand government and represents one of the
largest off-grid renewable energy projects in the
world. With this project, the islands will make the
transition from being completely dependent on
imported fuels to being completely energy
independent.

The project includes : 4032 solar modules, 196
string inverters, 112 DC charge controllers, 84
battery inverters and 1344 batteries in 48V banks.
The system allows for up to 2 days of energy
without any solar input. ???
