

The starting battery is a small battery and also a type of power battery. It is mainly responsible for providing electricity for electronic devices other than high-power appliances such as electric motors, air conditioners, etc. of new energy vehicles, such as headlights, wipers, door locks, horns, brakes, etc., which are all powered by it.

TOPAK was established in 2007, focusing on the production of lithium battery energy storage products for 16 years, with mature production technology and strong research and development strength dependent research and development of BMS which can be upgraded remotely and has a warranty of more than 5 years.

Shenzhen topak new energy technology CO.LTD. was established in 2007, covers an area of more than 30,000 square meters, is a professional lithium battery industrial application solutions provider, the company's products are used in industrial energy storage, home energy storage, electric power communication, medical electronics, security

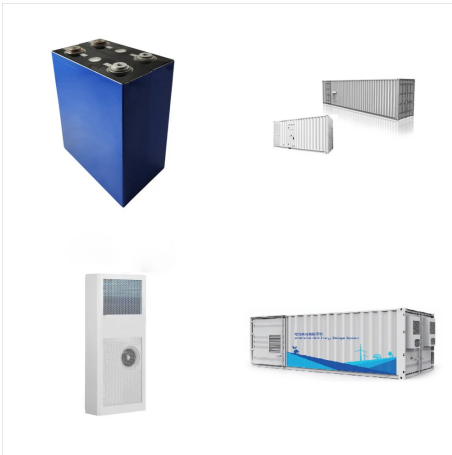

Topak focus on Li-ion battery, supply one-station in Li battery product and customized service of battery, BMS, structure design Home Energy Storage Solution Home energy storage can help ???

Shenzhen topak new energy technology CO.LTD. was established in 2007, covers an area of more than 30,000 square meters, is a professional lithium battery industrial application solutions provider, the company's products are used in industrial energy storage, home energy storage, electric power communication, medical electronics, security communications, transportation ???

Built to go further! The E-Xplorer TrunkBox is an eBike specific spare battery carrier made of expanded polypropylene providing excellent impact absorption, water resistance, high strength and thermal insulation. The grip straps secure your spare battery in place, there's even enough room to carry additional food, drink and gear for your eMTB adventures!

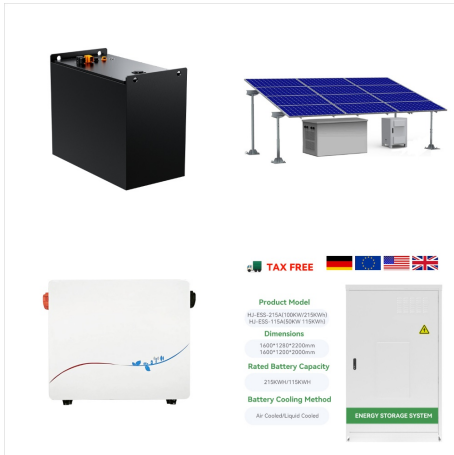

Shenzhen Topak new energy focus on lithium battery energy storage system research and development, production, sales and service, can provide energy storage converter, lithium battery, energy management system and other energy storage core equipment, is the world's first-class energy storage equipment and system solutions provider.
