Any time a lead-acid type battery is not at 100%, corrosion forms inside the battery. The more you allow the battery to be under 100% the more permanent this corrosion becomes and will hinder the battery's performance. Using a charger with desulfate mode will sometimes help you reduce this corrosion. This was one of the reasons I went to

Well, it's time for another new battery for the TTR-125. The bike isn't used very often and I DON'T keep in on a trickle charge. Would one of the Lithium batteries be better? They are pricey, about three times as much as the "normal" sealed battery. Last one was a Yausa, didn't last any longer than cheap brands.

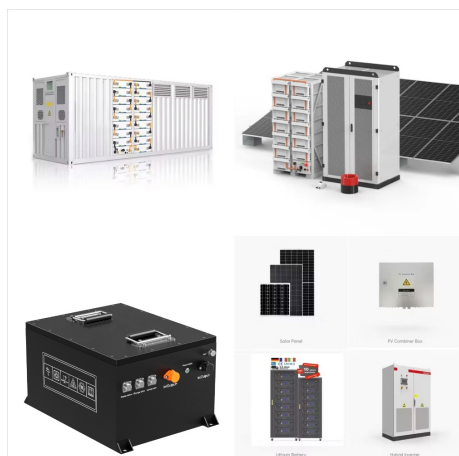

Batteries bring life to cars, trucks, motorcycles, ATV/UTV's, and lawnmowers, and the right battery parts and accessories ensure the power from the battery gets where it needs to go. Having a reliable and long-lasting battery is essential to keep your vehicle moving. Batteries

Universal Lithium 16V Battery by Antigravity Batteries(R). This battery offers the greatest power in the smallest package you can find for motorsports. It measures 5.9 x 3.4 x 5.12 inches (LxWxH to the top of battery) and weighs only 5

RV lithium batteries are becoming a popular choice among campers because of their lightweight and long life. Here are some of the best 12 volt options reviewed. For lead-acid batteries to last, they're usually not recommended to discharge below 50%. With lithium, it's not uncommon for users to discharge them down to 10-20%.
