broader flexibility solutions (IRENA, 2020a). 2. Enhance renewables resource assessment ???through zoning ??? Long-term energy planning relies on data from resource databases. Tunisia's current resource database, therefore, should be improved to reflect the recent assessment campaigns on renewable energy resources. More detailed resource data

Holistic support is being provided to the GoT's initiatives to transition towards renewable energy. The GoT plans to attract private investment in renewable energy through three regimes: i) concessions for large projects, ii) authorization for small and medium projects (up to 10 MW for solar photovoltaic and 30 MW for wind), and iii) self-generation for industrial customers.
