

Read up on Watt's Law. Figure out how much electricity your air conditioner uses. Realise that your 250W panel isn't actually going to produce 250W. You need to produce and store a lot more power than you have to run your air conditioner for any reasonable length of time.

The facts: air-conditioning accounts for nearly 20% of Singapore's CO<sub>2</sub> emissions, with a standard two-kW aircon unit in your room producing 1.4 tonnes of earth-warming emissions a year ??? and that's if you use it just 20 days a month. Worldwide, air-conditioning emits a hefty two billion tonnes of CO<sub>2</sub> a year. But if you want to keep cool

The solar day over the course of the year 2020. From bottom to top, the black lines are the previous solar midnight, sunrise, solar noon, sunset, and the next solar midnight. The daily range of atmospheric pressure (gray bars), as measured by the altimeter setting reported in e.g. a METAR report. Midway Islands, U.S. Outlying Islands

Cathedral City, United States. Air Conditioning and  
Solar. Now that Tibber cannot control it, I have set  
up a weekly schedule in the Panasonic app, which  
is also nothing to brag about. For instance, you  
can't set the fan speed you want???only  
temperature and "mode." Previously, when the  
pump worked with Tibber, it was fantastic.

Our dual 15,000-Whisper Quiet A/C units are 40 percent quieter than the competition, meaning a cooler, more restful night's sleep. Aside from dual air conditioners, the Eagle features dual power awnings, and a fresh water ???

WH901 - Technical Specifications Material 1. Made from Thermoplastic material 2. High Impact Resistance 3. Flame Retardant 4. High Heat Resistance 5. Protection from UV and Fading Type 1 Gang Set Ampere 20A Voltage 250V

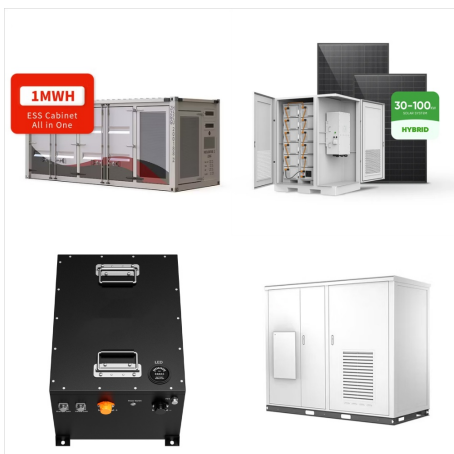

The only quirk I've noticed is that the minimum temp is 62.5F rather than 60F, but this was easy to override with HA's customize in configuration.yaml. 61F was the minimum this could be set to, and the display on the AC always shows 1 less than the set temp (i.e. the AC shows set temp of 60 while the actual set temp is 61).
