The U.S. Virgin Islands (USVI), part of the Leeward Islands of the Lesser Antilles, became a U.S. territory in 1917 and is located in the Caribbean Sea, about 1,100 miles southeast of Miami, Florida. 1,2 The USVI has no fossil energy reserves, but does have some renewable resources, particularly solar energy. 3,4,5 The USVI imports petroleum products to ???

solar market in the U.S. Virgin Islands, the rate structure of the program provided incentives that were ultimately deemed overly generous to the consumer. As an alternative, The new NEB program will continue to allow residents to install DG resources (such as solar, battery storage, and wind) on their home or place of business.

The U.S. Virgin Islands (USVI) includes the three main islands of St. John, St. Thomas, and St. Croix. The U.S. territory has a population of about 87,000 000 (U.S. Census Bureau 2022), and the primary industry is tourism (CIA 2023) . USVI is highly reliant on fossil fuel for their energy and all fuels are imported.

Pixii AS is committed to protecting and respecting your privacy, and we'll only use your personal information to administer your account and to provide the products and services you requested from us. From time to time, we would like to contact you about our products and services, as well as other content that may be of interest to you.

Effective Nov. 8, the Virgin Islands Energy Office overhauled the Virgin Islands Energy Storage (VIBES) program, opening up the application specifications to allow for larger battery systems to participate. VIBES is all about keeping the lights on, even when a storm or other event causes electrical service in the territory to be disrupted.

To qualify for the program you must be a full time resident of the territory, own a home and or business/non-profit, and have an active Water and Power Authority (WAPA) bill in your name. Further, the automatic battery backup system must have a capacity between 3 kWh to 20 kWh.
